# Cluster Initiative Bavaria

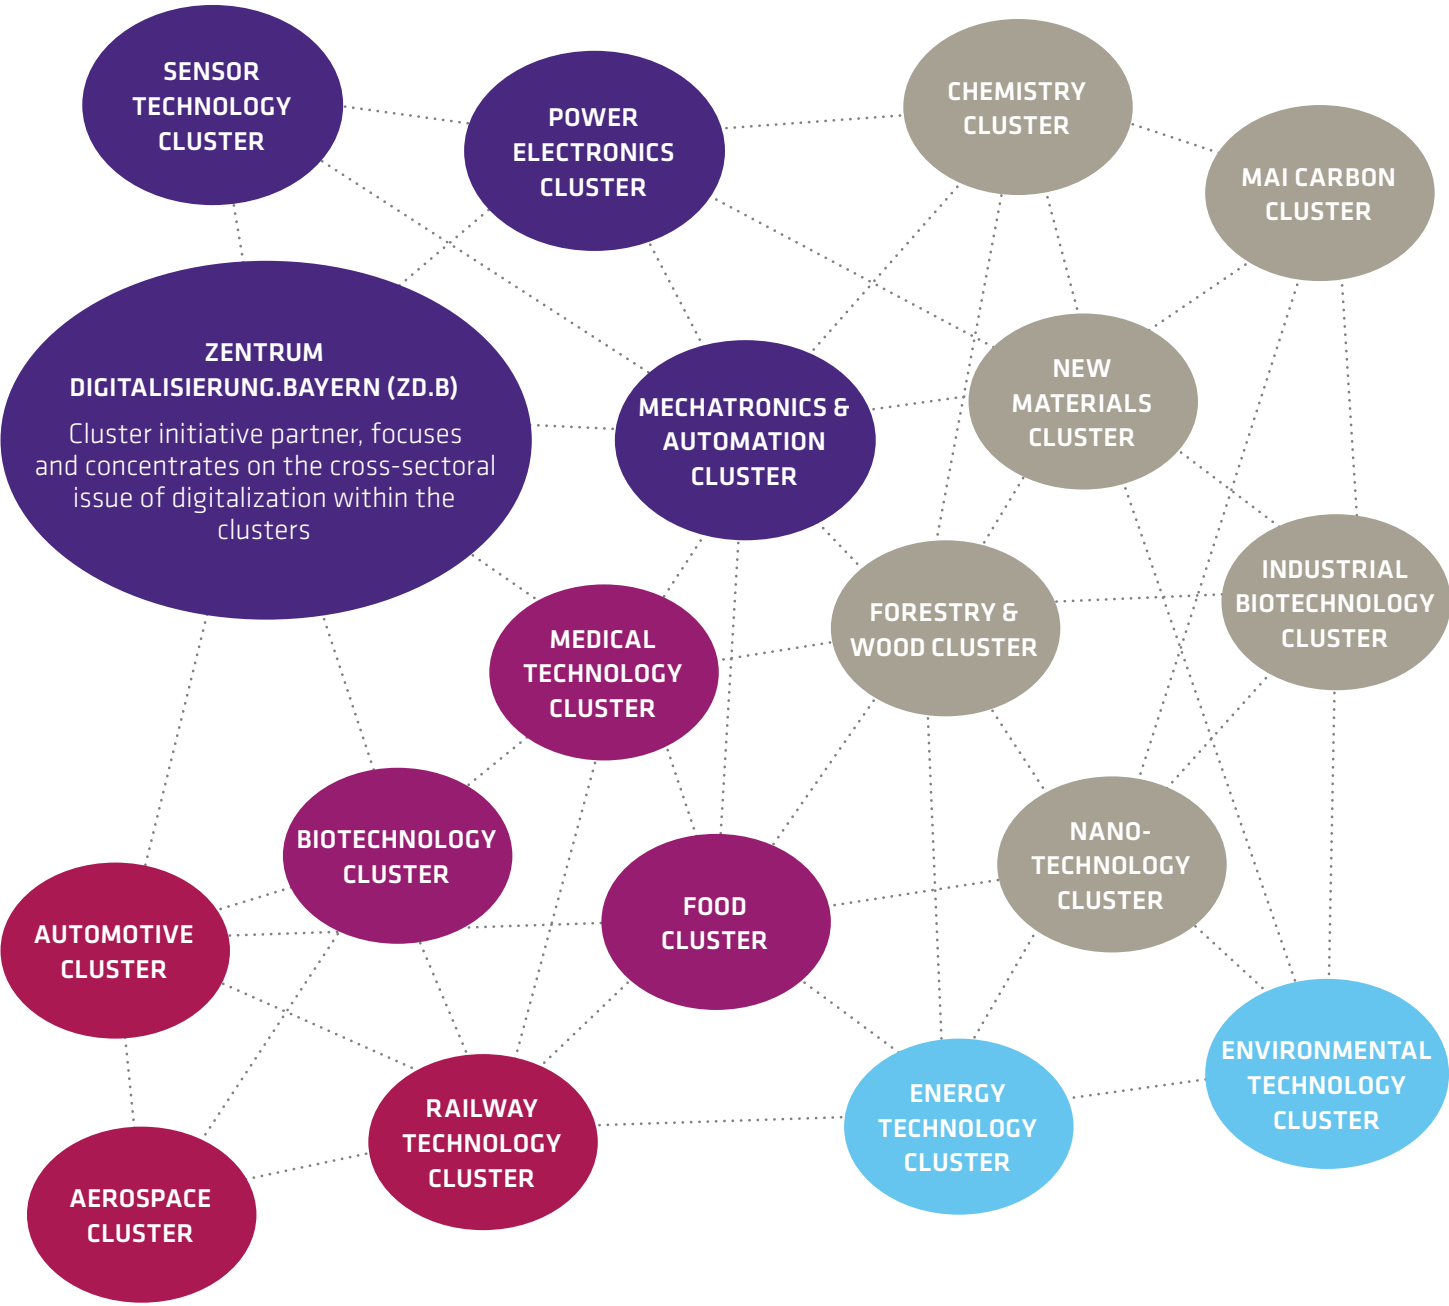

As part of its cluster policy, the **Bavarian State Government** supports the establishment of state-wide platforms in **high tech industries** and **traditional key sectors** of the Bavarian economy.

The **central task** of the cluster platforms is to **interlink enterprises** as well as **companies** and **research institutes**. The objectives of the cluster platforms are:

- to **strengthen the entire value chain** from research to the end product in Bavaria
- to **promote competitiveness** through cooperation
- to **convert research results into new products and services**
- to ultimately **increase the overall innovation dynamics** in Bavaria
- to promote **international cooperation in research and development**

## 5 FIELDS OF COMPETENCE

The Bavarian clusters are divided into 5 fields of competence with a total of 17 cluster platforms and the ZD.B:

TAP INTO THE NEWEST BUSINESS OPPORTUNITIES
